

Amphi

SEATING SYSTEM

Design Henri Halla-aho

Amphi benches of different heights can be used to form an auditorium-style seating arrangement. The unconnected Amphi seats enable the use of tables in between rows and the provision of ample legroom. The dense, soft material improves the acoustics of the space.

Equipped with either castors or glides.

Materials and finishing

Amphi is an environmentally friendly product bringing circular economy thinking into life. The material consists of left over cuts of foam plastic products

Upholstered with ISKU standard fabric as desired.

Dimensions

Amphi is sold in a set of six seats. One set includes seats of three heights: 2 seats of 26 cm, 2 seats of 40 cm and 2 seats of 54 cm. More info on the datasheet.

Amphi

SEATING SYSTEM

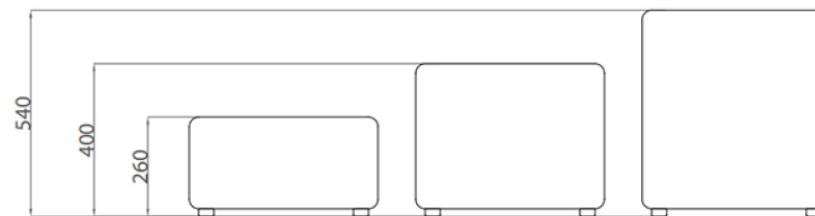

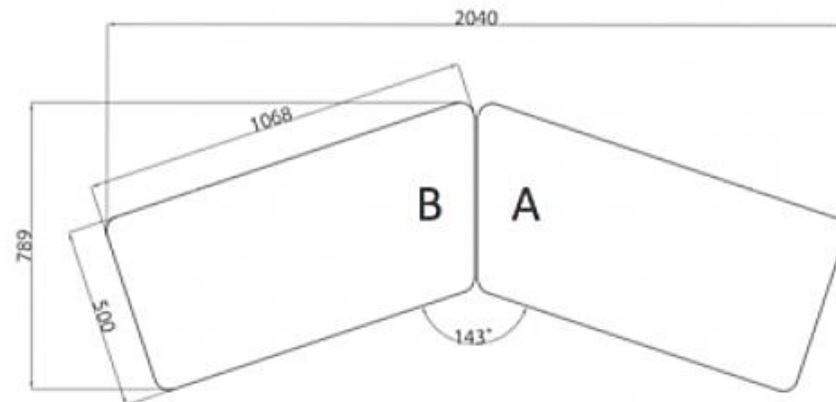

Datasheet

As the height and depth of Amphi seats follow the measures of the Kivikko seating solution, the two series work well as a variety of combinations.

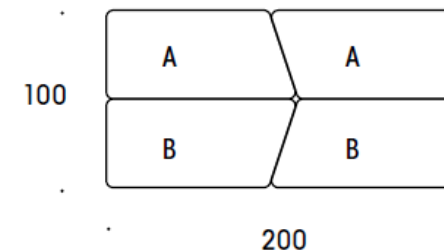

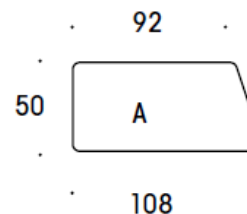

Heights: 26 cm / 40 cm / 54 cm.

Foot options: castors, standard, felt

The dimensions are in millimeters.

The dimensions are in centimeters.
