

Oksa

MULTIPURPOSE TABLE

Design Ilari Jääskeläinen

Oksa is a multipurpose table that can be used anywhere. The legs of the Oksa table nicely represent the new arrival of solid wood in interior design for office and learning environments. Combining metal and wood has been successful at the Oksa table in a natural way. The decorative leg mounting bracket is a functional and at the same time beautiful detail that can be emphasized with colors. The structure of the leg is light, but still very sturdy.

Materials and finishing

Leg	Natural wood (birch, ash, oak), stained beech and ash colours and white painted.
Top	ISKU standard hard materials
Decorative	Powder coated steel (silver, white, black, wine-red, blue or green) or chrome.
