

# Roller

## TROLLEY

Design Henri Halla-aho

The Roller trolley is a steady and versatile storage trolley not only for students' bags, but also for books, games and teaching equipment. Designed to move, it brings both flexibility and order to any space. It also helps to make shared storage rooms more functional: when tools and materials needed in teaching can be stored on trolleys instead of shelves, and it is easy and handy to move them from one room to another. Roller has four large rubber wheels, two of which are locking.
